

SESSION 10 – There’s No Planet B – so it’s time for action!

VIEW THE SLIDES in ‘SLIDE SHOW’ mode – and then all the links will work!!

Please do send us photos of your children enjoying this club!

(Resources required – Device/s to enable making of their own movie/s + props?)

Slide 2 – Challenge Review

Did you have any interesting conversations about climate change this week?

Did you share your cartoon / drawing?

Slide 3 – There’s No Planet B

It’s time for action.

Recent research suggests that if the UK is to meet its carbon reduction target – we, as individuals, will NEED to make changes to the way we do things.

Carbon emissions reductions can’t all be made by changing to low-carbon technologies.

What do you think are some of the reasons why people don’t want to make changes to their lifestyle to help combat climate change?

(Hopefully having joined this Climate Change Club you will now agree that they aren’t good reasons!)

- My friends aren’t doing anything, so why should I?
- Climate Change won’t really matter for quite a few years – we can sort it out then.
- Climate Change won’t really bother us that much in the UK, so I’m not going to get involved.
- I’m sure we’ll be fine – I’m optimistic, it’ll all work out ok.
- We can leave it to the government and businesses – they’ll sort it out.
- There’s no point in me just making little changes, they don’t make any difference.

Discuss with your classmates why these ‘excuses’ aren’t good enough – the slides in this session can be used to help counter each of these points.

Slide 4 – It’s movie time!

Can you create your own climate change movie for a school assembly?

Now that you understand so much about climate change and why we all need to act NOW – can you make movie and explain this to others. The more we talk about and learn about climate change, the more efficiently we can work together to tackle climate change.

Look back over the topics you have covered in this club? (maybe the ‘Take away’ points from each week?)

Maybe insert your 4 favourite slides as images into the video (or print off)?

Climate Change Club in a Box – Teacher’s notes.

Show your OWN jigsaw, posters, art work, carbon footprint, cartoon drawing?

The next couple of summary slides might be helpful?

Don’t forget to encourage your audience to become Young Climate Warriors!!

Remember to LET YOUR VOICE BE HEARD – email / post photos, and

‘HIT THE RED BUTTON’ on the website to let us know when you have completed a challenge!

Slide 5 – We need to act now

‘We are running out of time, but there is still hope,’ Sir David Attenborough

Slide 6 – Who needs to act? – We all do, but particularly the ‘richer countries’

‘The richest half of the world’s population is responsible for 90% of global carbon emissions’. Oxfam

Slide 7 – Won’t someone else solve it – governments, businesses?

‘The greatest threat to our planet is the belief that someone else will save it’

Robert Swan, British arctic and Antarctic explorer

Slide 8 – Almost everything we do has an impact on climate change.

‘EVERYTHING YOU DO MAKES A DIFFERENCE, and you have to decide what kind of difference you want to make.’ Jane Goodall, world expert on chimpanzees.

Slide 9 – ‘Little by little’

‘Little by little, a little becomes a lot’ Tanzanian proverb

Slide 10 - Even me?

‘You are never too small to make a difference.’ Greta Thunberg

Slide 11 – Have you sign up yet? – become a Young Climate Warrior today!

Join the Young Climate Warriors team taking action to combat climate change*.

www.youngclimatewarriors.org

Join with over 1,000 children in over 230 different schools across the UK.

Can you help us remarkably and dramatically change the way we all do things?

Sign up on the website to receive a new challenge every week

All challenges must be undertaken with the supervision and at the discretion of a responsible adult

You’ll be part of a big team with hundreds of other children, doing the **SAME** challenge in the **SAME** week, to help tackle climate change.

Slide 12 – Let your voice be heard!

As part of a big Young Climate Warriors team we can make it easier for adults to HEAR OUR VOICES – we can tell them how much we care about climate change by doing something about it in our own homes.

Let your voices be heard by:

- 1) **HITTING THE RED BUTTON EACH WEEK** – when you’ve completed the week’s challenge.
- 2) Sending us photos for the use on Social Media and on the Gallery page on the Young Climate Warriors website
- 3) Asking your parents / carers to follow us / tag us / share on social media.
(@youngclimatewarriors, #youngclimatewarriors)

The ‘RED BUTTON’ is on the weekly email and on the website – when you ‘HIT’ it – it sends a blank email to us to know that you have completed the challenge – we can then count up the number of Young Climate Warriors participating – and count up the difference you are making!

Slide 13 – Tell your friends.

When you have shown your movie in assembly – think about what you can do next to keep everyone in your school motivated to doing things for climate change.

Maybe you could:

- Look at the Young Climate Warriors website with your classmates in form time?
 - Post up the weekly challenge on a notice board or announce it in Friday’s assembly?
 - Have a ‘red button’ competition at school? We can let you know the numbers of people ‘hitting the red button’.
 - Share some of the ideas and video clips in this ‘Climate Change Club in a Box’ – in assembly? In form time? With your School Council?
 - Chat to your friends about the weekly challenges, persuade them to become Young Climate Warriors too?
-

Slide 14 – The future of our planet is in our hands.

Let’s tackle climate change together.

Slide 15 – We hope you have enjoyed this Climate Change Club in a Box

We’d be extremely grateful if you could send us photos of children enjoying the club – and photos of the various things they have created!

Any other feedback also really appreciated please!
